

Marketing Materials for "SplitBill" App

Category: Finance & Productivity

Description:

SplitBill is the ultimate solution to simplifying shared expenses among friends, family, or colleagues. Whether you're dining out, planning a trip, or managing household bills, SplitBill takes the hassle out of splitting costs, ensuring everyone pays their fair share.

With an intuitive interface, users can easily add friends to the app, including their names and phone numbers, for quick access during expense creation. Adding expenses is seamless, allowing for detailed descriptions, total amounts, and participant selection with a tap.

Dive into the details of each friend's profile to see all related expenses, providing a clear breakdown of who owes what. SplitBill automatically calculates each participant's share based on the total bill and the number of people involved, eliminating the need for manual calculations.

New Features:

- **Firestore Integration:** Secure and efficient database management.
- **Friend Search:** Find friends easily by phone number or email.
- **Receipt Upload and Reading:** Upload photos of receipts, and let the app automatically read and extract the amount and description.
- **Flexible Expense Splitting:** Add expenses with multiple split types—equally, by percentage, or by actual amount.
- **Detailed Bill Calculations:** See exactly how much one person owes you or how much you owe them, providing full transparency.

Beyond its core functionality, SplitBill fosters transparency and accountability in financial dealings among peers. Its design is tailored for anyone looking for an efficient way to manage shared expenses, from students living together to groups traveling on a budget.
